Felipe Venegas Bio it's loud, it's Latino, and it's certainly not holding back. Felipe studied classical music traditions some years back and we're awfully glad he did since his scholarly days he's ventured into more electronic realms, retaining a rhythmic, percussive feel that we just love. His accomplished live set has found its way onto Chilean line-ups along side the likes of Ricardo Villalobos, Luciano and others - expect to see more of this burgeoning talent in the months to come. The music of Felipe Venegas he is played for the big stars of electronic music of the world.
